Cat Sitter Guide

Taking care of Luke & Leia

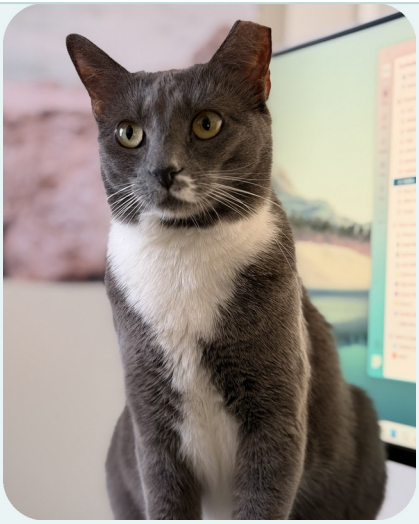

Thank you so much for looking after our cats! Everything you need is below. The checklist on this page covers the basics, and the sections after it have the details.

Meet the Cats

Luke (boy, solid grey)

- Has **no teeth**, so his food must be broken into small pieces.
- A "scarf and barf" cat: eats too fast, then throws up.
- Sometimes sleeps through the auto feeder.

Leia (grey with white)

- A little chubby; we're watching her weight.
- Will eat any food left lying around.
- Sometimes walks away from her bowl before she's done.

Daily Checklist (Quick Reference)

✓	When	What to do
☐	**Morning**	Canned food: 2 spoons each. Break up both portions; spread Luke's out.
☐	**Morning**	Scoop both litter boxes.
☐	**After meals**	Wash the bowls right away (much easier while fresh).
☐	**Midday (optional)**	Scoop litter again if you can. Skipping it is fine.
☐	**All day**	Auto feeder goes off every 3 hours from 6 AM (skips 6 PM). If Luke doesn't show, put the kibble back in the feeder.
☐	**Evening**	Canned food: 2 spoons each, same as the morning.
☐	**Evening**	Scoop both litter boxes.
☐	**Wed / Mon night**	Trash out Wednesday night (Thursday pickup); recycling out Monday night (Tuesday pickup).

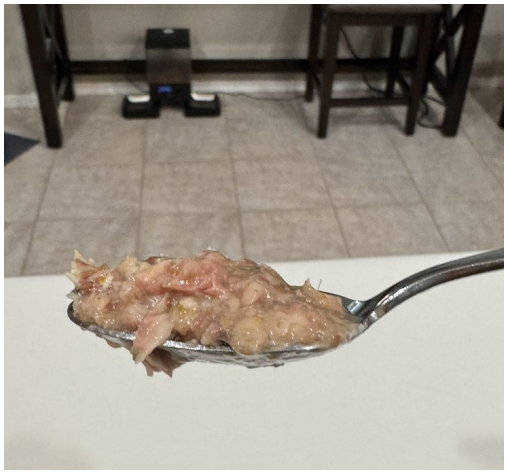

Feeding

Auto Feeder (Kibble)

- Goes off **every 3 hours during the day, starting at 6 AM**. It **skips 6 PM**.
- Luke sometimes sleeps through it. If you hear it go off and he doesn't show up, **dump the kibble back into the feeder**.
- Otherwise Leia will eat it. That's not a disaster, but we're trying to watch her weight.

Canned Food (Twice a Day)

- The open can is **in the fridge** with a **blue reusable top**. Extra cans are **in the pantry**.
- A **new shipment** of canned food arrives **Wednesday**.
- Each cat gets **2 spoons** per meal (see the photo below for what "1 spoon" looks like).
- **Break both cats' food into small pieces.** Luke has no teeth, and he'll eat Leia's food too.
- **Spread Luke's food out** across the bowl with the back of the spoon so he can't scoop it all up at once. This keeps him from eating too fast and throwing up.

This is 1 spoon.

Luke's food spread out across the bowl so he can't scarf it.

If Leia Doesn't Finish

- Sometimes she walks away. If you bring the bowl to her, she'll often finish it (but not always).
- **Only a little left?** Luke can have it.
- **She left most of it?** Throw it down the sink.
- Please don't leave food lying around; Leia will eat it.

If Luke Begs Later

Right now: Luke's throat seems a little sore

- If he shows up later begging, give him **2 spoons of canned food** (instead of kibble).
- Once **his voice starts coming back**, go back to the normal snack: **1 tablespoon of kibble**.

- He may still be hungry after his canned food and come back for more. That's okay: you can feed him again, just **wait about 30-40 minutes** first so he doesn't throw up.

Bowls

- Wash the bowls **right after they finish eating**. They're much easier to clean before the food dries.

Litter Boxes

- There are **2 boxes**: one in the **master bedroom** and one in the **master bath**.
- Scoop **at least twice a day**: once in the **morning** and once in the **evening**.
- I usually also scoop once **midday**. If you miss it, that's fine.

Using the Litter Disposal Can

There's a special trash can next to the boxes (a Litter Genie). It stays sealed, so there's no smell and you don't need to take litter out to the outside trash.

1. **Lift the lid** on the can.
2. **Scoop** the litter box. Dig around a bit to get the bottom.
3. Put the dirty litter **on top of the little shelf**.
4. When you're done, **pull the shelf/handle** to drop the litter into the bottom.
5. **Close the shelf**, then **close the lid**.

Scoop it, drop it, lock it.

Trash & Recycling

- **Trash** pickup is **Thursday**. You can put the bin out **Wednesday night**.
- **Recycling** pickup is **Tuesday**. You can put the bin out **Monday night**.

Thank you for taking such good care of Luke & Leia!
